# Goals and added value

Get EPLAN Platform 2022 up and running quickly and securely in your company, even in parallel to other versions, including Version 2.9.

- Deepen your expertise about the EPLAN licencing technology
- Discover the advantages of the new subscription model from EPLAN
- Benefit from useful background information on topics including the common Identity Client for the EPLAN Platform 2022 and EPLAN Cloud as well as setting up organisations in the cloud environment
- Learn about the newly integrated rights management to clearly and securely define access rights for EPLAN users
- Use the new internal device database from EPLAN or take full advantage of migrating earlier database versions
- With our best practice guidance, you'll quickly and easily have success switching from a project template to a basic project

# Who benefits from Training?

- Training is tailored to the needs of key EPLAN users, administrators and those responsible for integrating the EPLAN Platform into a company's system landscape.

# An overview of training highlights
